JHS - 6 classrooms

BRIEF HISTORY OF THE SCHOOL

Ofgator Basic C was established on 2nd October 1990 as Junior secondary school (JSS) with a population of 15 pupils comprising 7 boys and 8 girls. Mr. Agawu took over from

Mad. Esther Ansong on 7th October 2015 as the fourth headteacher of the school and Mad. Cynthia Okyne, the current headteacher took over from Mr. Agwal Mensah on January 15th 2026. In 2021, the primary department was added making the school a Basic school, the school has now 522 learners and 21 teaching staff.

Stakeholders collaborating with the school

Parents And Teachers Association
Chiefs and people of Ofaakor
School Management Committee
Member of Parliament of Awutu Senya East

Classroom rule	Why this rule is important	How the rule is enforced	consequences if broken
Raise your hands before you can speak	It keeps order and avoids noise.	Teacher remind students to raise hands	Cleaning or asked to wait quietly
Do your homework	Helps practice what is taught.	Teacher checks home work daily	Cleaning or extra work is assigned
No chewing of gum in class	keep class clean and avoids distraction	Teacher reminds student to stop	Cleaning practice gum is taken away

TOPIC 10.1: Induction in School 2-familiarization and orientation

Day of visit Monday

Date of visit 11th May 2026

Activities 10.1.1-10.1.3: Sensitization on school culture and wider school life

SRJ Task: record your reflection on the following:

School culture

I observed that the school has a very good culture of discipline, neatness, punctuality and respect. Learners and teachers dress neatly and maintain good hygiene. The learners are very respectful, greet teachers whenever they see them. Learners also come to school early and during lesson hours they remain in their classrooms, as noone is seen roaming around unless it is break time.

Key education policies

I observed that the school displays important educational policies on pink posters placed on the walls around the school. These include child protection policy, learner's rights and discipline policies. These ~~include child~~ displays help both teachers and learners to be aware of the rules and their responsibilities in the school.

The wider school life

I observed that wider school life includes activites outside the classroom. Learners play football on the field during breaktime and also socialize. I also saw a teacher taking learners outside the class for learning activities. This shows that school life is not only about lessons but also includes play and outdoor activities that support learners develop.

What new knowledge have you learned from the induction?

From the induction, I learned that the school culture is based on discipline, punctuality, respect and neatness among teachers and learners. I also became aware of key policies like child protection and discipline and I observed that learning also takes place beyond the classroom though sports and outdoor activities.

Topic 10.2: Identification of key features of the Basic School Curriculum (BSC)

Day of visit Wednesday

Date of visit 13th May 2026

Activities 10.2.1-10.2.2

SRJ Task: Identify the key features of the Basic School Curriculum (BSC).

What have I learnt about the scope and sequences in the BSC?

I learned that in the basic school curriculum, scope refers to the topics that are to be taught, while sequence refers to the order in which they are taught. I understood that topics are arranged from simple to complex to help learners progress smoothly.

What ideas are behind the sequencing of the sub strands across the grade levels?

I learned that ~~sequencing~~ of content across grade levels is based on principles such as simple to complex, known to unknown, and concrete to abstract, continuity, and progression. This helps learners build on previous knowledge and progress smoothly from one level to another.

How will I apply this new knowledge in my teaching/class?

I will apply this knowledge by planning my lessons from simple to complex and linking new ideas to what learners already know. I will also use real-life examples before introducing abstract concepts to help learners understand better and progress smoothly.

Why is continuity and progression important in lesson planning?

Continuity and progression are important in lesson planning because they help learners build on previous knowledge and move gradually from simple to more complex ideas, making learning easier and more effective.

Topic 10.3: Observation of classroom and wider school life

Day of visit 18th May Monday

Date of visit 18th May 2026

Activity 10.3.1

SRJ Task: Observation of classroom teaching and learning

Make a list of the different teaching approaches that could not be observed during teaching and learning period.

Roleplay
Stimulation Approach
Excursion Approach
Debate
Experimentation

What best practices did you observe during the lesson?

I observed that my mentor asks learners questions after giving notes to check their understanding. I also noticed that after teaching he gives learners group work based on the lesson where they work in groups to apply what they have learned.

List any cross-cutting issues (inclusivity and diversity) that emerged during the teaching and learning interactions and state how they were addressed.

Equity and Language diversity
I observed inclusivity in the lesson through the use of bilingual teaching. The teacher explained concepts in Fante to help the majority of learners understand, and then repeated the explanation in English to ensure that a Nigerian learner who did not understand Fante also followed the lesson.

Activity 10.3.2:

Observation of classroom teaching of small groups with learning needs.

What are the implications of the following domains of the learning needs of the four (4) learners?

Cognitive

Cognitive learning needs imply that learners have different abilities in understanding and thinking. Some learn quickly while others need more explanation and time. Therefore, the teacher must use different teaching methods and strategies to support all learners.

Affective

Affective learning needs refer to learners' feelings, attitudes, confidence, and motivation towards learning. Some learners may feel shy, lack of confidence, or loose interest easily. This means the teacher must encourage learners, praise the efforts, and create a supportive and friendly classroom environment to help them stay motivated and participate actively in lessons.

Psychomotor

Psychomotor learning needs are about learners physical skills like writing, drawing, and doing pratical work. Some learners may find these activities difficult. The teacher should demonstrate and guide

them step by step. Learners should be given time to practice. This helps them improve their skills.

Social

Social learning needs is how learners interact and work with others. Some learners may find it difficult to communicate or work in groups and the teacher should encourage group work and team activities. This helps learners learn from each other. It also improves their confidence and cooperation skills.

Activity 10.3.3: Observation and participation in the wider school life

Observation on individual and group activities that go on in the wider school life/community

Learners' lunch or play time activities

I observed that during lunch and play time, students engage in different social activities such as playing games, interacting with friends, and buying food. Some students also play football on the school field while others sit and socialize.

Behaviour of learners

I noticed that learners behave in a disciplined and respectful manner during school hours. They come to school early, show respect to teachers, and interact politely with their peers. During lesson time, they raise their hands to ask questions and also pay attention to the teacher.

Activities during assembly time

I observed that during assembly time, learners participate in activities such as singing the national anthem, listening to announcements, and receiving instructions from teachers. They also engage in prayers and are reminded about school rules and upcoming activities.

Staff meetings

I observed a meeting among teachers where issues concerning teaching, learner discipline, and school activities were discussed. Teachers shared ideas and information to ensure the effective management of the school and the improvement of the school student's academic performance.

Lessons learnt from stakeholder meetings such as staff PTA, SMC or CPD

I did not have the opportunity to attend any stakeholder meeting such as staff meeting, PTA meeting, SMC meeting or CPD session during my observation period. However, I learnt from interacting with teachers and observing school activities that collaboration among stakeholders is important for the smooth running and development of the school.

Co-curricular activities

I observed learners participating in various co-curricular activities such as football, physical education lessons, singing during assembly and sanitation exercises. These activities helped learners develop teamwork, leadership skills, confidence, discipline and physical fitness.

Student teachers' participation

As a student teacher, I participated in morning assembly supervised learners during break time, assisted in maintaining discipline, and took part in school clean-up activities. These activities helped me gain experience in managing and interacting with learners.

Others

Attendance of school assemblies programmes.
Participation in school religious activities (wednesday morning devotions).
Observation of teacher-student interactions outside the classroom.
Participation in tests supervision.

TOPIC 10.4: Small scale classroom enquiry with four (4) learners

Day of visit Tuesday

Date of visit 19th May 2026

Activity 10.4.1

SRJ Task: Identification of learners' learning needs.

Record the learners' learning needs you identified and suggest ways of addressing them in table 10.4.1

Table 10.4.1: Learners' learning needs and suggested solutions

S/N	Learners' learning needs	Suggested ways of addressing them
1	Poor reading skills	Encourage daily reading and practic
2	Low attention during lessons	Use of interactive teaching method like question
3	Difficulty in solving exercises	practice questions with guidance
4	Difficulty in understanding some topics	Use of simple explanations

Activity 10.4.2

Designing simple tools for data collection

State three ways of collecting data on learners for a study

1. Observation
2. Interview
3. Questionnaire

Activity 10.4.3:

Analysis of data collected and writing of report on the learning progress of learners

Write at least two key things you have learned in activity 10.4.3

1. I learned how to ~~collect~~ analyse learners data to understand their progress, strengths and weaknesses.
2. I learned how to write a clear report on learners' progress and suggest ways to improve learning.
